Video size:*   Video width:* (px)   `1080`   Video height:* (px)   `1080`

Use the video width and height to set the video perfectly on the market image. Ideal if you to show a video on a portrait poster. Make sure the actual video size match the marker image.

Advanced video settings

Video positioning: X: `0`   Y: `0`

Video scale: `1`

Use the settings above to position the video on the marker image by moving side ways (X), up/down (Y) or front/back (Z). Use video scale to increase or decrease the size of the video. Use +/- decimal numbers. (Ex -0.02 to move left 0.02 to move right).

Curve video:

Value: ()

Use the slider to adjust the video curvature inwards or outwards.
