Video Settings for dexxr-Eva

Hide video when the marker image is lost:

OFF

Map video to marker image:

ON

Remove green screen from video:

ON

Hex color:* #

00FF00

1) Videos should exported at 720p (1280 X 720)
-this is double the width and height of the usual recommendation for other videos.

2) Video should be export as h.264.mp4 with target bitrate of 3Mbps (max 5Mbps).
-higher bitrate means larger file size but also higher in quality (clearer) which is good for green screen removal.

3) Typically use the solid green background colour of
-Hex: # 00FF00
-RGB: 0 255 0

4) It is recommended that the video should be cleaned and optimized using a video editing software such as Adobe After Effects, Adobe Premiere Pro, etc. before exporting to .mp4

STEP 2   Turn on button. (*Green screen color #00ff00)
